The Intertwined Nature of Legal Ethical and Global Considerations

These three aspects of the business environment are inherently intertwined Legal regulations often reflect societal

values and ethical principles while global business practices are influenced by both legal and ethical considerations. in the wake of the second world war internationalists identified science as both the cause of and the solution to world crisis unless civilization learned to control the unprecedented powers science had unleashed global catastrophe was imminent but the internationalists found hope in the idea of world government in the postwar origins of the global environment perrin selcer argues that the metaphor of spaceship earth the idea of the planet as a single interconnected system exemplifies this moment when a mix of anxiety and hope inspired visions of world community and the proliferation of international institutions selcer tells the story of how the united nations built the international knowledge infrastructure that made the global scale environment visible experts affiliated with un agencies helped make the global as in global population global climate and global economy an object in need of governance selcer traces how un programs such as unesco s arid lands project the production of a soil map of the world and plans for a global environmental monitoring system fell short of utopian ambitions to cultivate world citizens but did produce an international community of experts with influential connections to

national governments he shows how events and personalities cultures and ecologies bureaucracies and ideologies decolonization and the cold war interacted to make global knowledge a major contribution to global history environmental history and the history of development this book relocates the origins of planetary environmentalism in the postwar politics of scale

human activity is changing the global environment on a scale unlike that of any other era environmental deterioration is now a global issue ecologically politically and economically that requires global solutions yet there is considerable disagreement over what kinds of strategies we should adopt in order to halt and reverse damage to the global ecosystem what kinds of international institutions are best suited to dealing with global environmental problems why are women and indigenous peoples still marginalized in global environmental politics what are the consequences of the global ecological crisis for economic and security policies the global politics of the environment makes sense of the often seemingly irreconcilable answers to these questions it focuses throughout on the tensions between mainstream strategies which seek to build support for reforms through existing institutions and radical critiques which argue that environmental degradation is a symptom of a dysfunctional world order that must itself be transformed if we are to meet the challenge of saving the planet
